The problem

DeFi lacks sustainable and transparent, perpetual yield solutions

With current DeFi solutions, investors face high risks, loss of asset ownership and therefore insolvency risk, impermanent loss, lack of transparency, low gains

No seamless way to generate consistent returns.

DeFi lacks proper solutions to establish a proper crypto yield market

Zero insolvency risk

The 1XMM token

A well-rounded utility token to retain users:

The 1XMM token gives access to rebate across all 1xMM Pools, and beyond 1xMM Pools, to all subsequent projects that will be developed

The token is deflationary, auto-exchangeable and auto-burnable

The token will have a dedicated 1xMM Pool that will deliver up to 6% yield per year

The token is a CCT token, using ChainLink technology for frictionless cross-chain transfers

Market Opportunity & Competitive Edge

Competitive edge

- The DeFi market is projected to grow exponentially
